

Sajjad Zaidi

Senior Software Engineer (Applied AI / GenAI Systems)

sajjadalizaidi00@gmail.com | [linkedin.com/in/sajjadalizaidi](https://www.linkedin.com/in/sajjadalizaidi) | [youtube.com/@CodeStudio-co](https://www.youtube.com/@CodeStudio-co)

SUMMARY

Senior Full-Stack Software Engineer with 5+ years shipping production web platforms, now specializing in applied AI/GenAI engineering. AWS Certified Generative AI Developer (Professional), with hands-on experience integrating LLM-backed agents into production systems and daily use of AI coding agents. Combines deep full-stack delivery experience with React, Node.js, RoR, Java Spring Boot, including legacy-to-new-stack migrations and a Redux-driven portal with certified expertise across Bedrock, Guardrails, prompt engineering, and multi-agent orchestration concepts.

CERTIFICATIONS

- AWS Certified Generative AI Developer – Professional (AIP-C01) — May 2026 — Bedrock, RAG architecture, Prompt Management, Guardrails, multi-agent orchestration

TECHNICAL SKILLS

Applied AI / GenAI: LLM API & Agent Integration, AI Agent Orchestration, AI Workflow Automation, AWS Bedrock, Prompt Engineering, Prompt Design & Optimization, RAG, Guardrails, Multi-Agent Orchestration Concepts, LLM Integration, Conversational AI Integration, AI-Assisted Software Development, Generative AI Application Development, AI-Powered Feature Development, Context Engineering

Full-Stack Development: JavaScript/TypeScript (JS/TS), React.js (ReactJS), Next.js (NextJS, App Router), Node.js (NodeJS), Express.js, Ruby on Rails (RoR), Java Spring Boot, Django, Redux/Redux Toolkit, Tailwind CSS, Material UI (MUI), Bootstrap, JPA/Hibernate, Maven/Gradle

APIs & Architecture: REST & gRPC APIs, Microservices

Databases: PostgreSQL, MySQL, MongoDB, DynamoDB, SQL Server

Cloud & Devops: AWS (Lambda, EC2, S3, ECS, RDS, CloudFormation, CodePipeline, API Gateway, Amplify, CodeCommit), GCP (Firebase SDK, Identity Platform), Docker, GitHub Actions, Firebase Hosting

Tooling & Monitoring: Cursor, Codex, Git, Datadog, Grafana

Testing & QA: Manual/exploratory testing, Selenium test automation, pre-launch release QA

Security: Bot detection, DDoS prevention & mitigation

PROFESSIONAL EXPERIENCE

Senior Full-Stack Software Engineer — Exper Labs

Lahore, Pakistan | September 2021 – Present

- Integrate LLM-backed agents to automate tasks, generate structured content, and orchestrate workflows.
- Led internal learning sessions on AWS Bedrock, RAG architecture, Prompt Management, and Guardrails following AWS GenAI certification.
- Own core modules of a multi-application platform consisting of customer website, employee portal, and partner portal built with Ruby on Rails, React, and Java Spring Boot.
- Maintained both legacy and its in-progress migration systems running in parallel, studying legacy behavior, porting pages and features to the new stack, and testing, deploying, and monitoring rollouts.
- Work across frontend and backend teams, designing and shipping production-grade full-stack features end-to-end using TypeScript, React, Node.js, and REST APIs, from UI to persistence.
- Contributed to backend services within a Java Spring Boot microservices architecture by building complex workflows and full CRUD REST APIs, and leading data migrations alongside full-stack integration work.
- Independently rebuilt one of four parallel in-house automation systems, replacing a third-party solution and raising its success rate from ~65% to 90%+.
- Received Dashing Debut Award for leading the QA for a major feature launch within 4 months of joining.
- Supported junior devs through mentorship while performing hands-on QA to validate new features before release.

Software Engineer — Menace Studio

Lahore, Pakistan (Remote) | February 2021 – August 2021

- Worked as a JavaScript developer with hands-on AWS (Amplify, CodeCommit, EC2, Lambda) and GCP (Firebase SDK, Identity Platform).
- Built a multi-tenant GCP-based demo application using ReactJS, deepening core JavaScript fluency.
- Published technical articles on Medium and Dev.to on building Chrome extensions with React.

SELECTED PROJECTS

LinkedIn CRM — Internal Tool, Exper Labs

Stack: TypeScript, Next.js, Supabase, Vercel

- Built an internal CRM used by Exper Labs' leadership and business development team to manage outreach across multiple master LinkedIn accounts.
- Implemented CSV import with diffing logic, connection status classification, collaborator roles for shared account management, and an inbox-style messaging UI.
- Iterated on the product with a "Replied" status, collapsible filter UI, scoped import recalculation, and SQL-level debugging.
- Currently building a Lead Finder feature integrating the iTunes Search API with developer contact enrichment.

Padel Tournament Management Platform — Exper Labs

Stack: TypeScript, React, Vite, Tailwind CSS, Material UI, Python, FastAPI, SQLAlchemy, Alembic, MySQL, Firebase Hosting, GitHub Actions

- Owned a full-stack tournament management platform end-to-end across frontend, backend, database, and deployment, supporting the complete tournament lifecycle for padel clubs and organizers.
- Built tournament creation/configuration, bulk player and team registration, category and group management, and automated match scheduling across multiple formats (Round Robin, Group Stage, Knockout, League).
- Delivered live score submission, standings, bracket progression, public tournament pages, and an admin portal for managing players, teams, matches, and rounds.
- Designed REST APIs and evolved the database schema via Alembic migrations; improved API contracts with bulk registration, roster/player search, latest-score retrieval, and deterministic ordering.

Pornography Blocker (BSCS Final Year Project)

Stack: TensorFlow, Chrome/Edge Extension APIs, Firebase

- Built a Chrome/Edge browser extension using a TensorFlow model to classify and block pornographic imagery in real time.
- Hosted the classification model via Firebase for in-browser inference, keeping detection responsive without server round-trips.

EDUCATION

BS, Computer Science — FAST National University of Computer and Emerging Sciences (NUCES), Lahore

2017 – 2021

INTERESTS

- Book reading, MMA, News

EXTRA-CURRICULAR ACTIVITIES

- Founded CodeStudio — Pakistan's first Computer Science YouTube channel in Urdu.
